

SHIVAM KUMAR

Senior Software Engineer | AI/GenAI Full-Stack | .NET, Java, React & Angular

Noida, India

+91 72109 97712 | 2016010077.shivam@gmail.com | [LinkedIn](#) | [GitHub](#) | [Crio Portfolio](#)

PROFESSIONAL SUMMARY

Senior software engineer with 6 years of experience building, modernizing, and supporting enterprise applications across life and annuity insurance, utilities, healthcare, HR/ATS, and digital services. Hands-on expertise in C#, .NET/.NET Core, ASP.NET Core, React, Angular, REST APIs, SQL Server, PostgreSQL, MongoDB, Azure, Docker, and CI/CD, with working proficiency in Java, Python, and Node.js for integrations, scripting, and AI prototyping. Experienced in system design, API and data architecture, event-driven integration, performance, reliability, and production operations. Led module delivery for six global clients and shipped a GPT/LLM-based workflow automation that improved operational efficiency by 20%.

TECHNICAL SKILLS

AI & GenAI Engineering: GPT/LLM application integration, prompt engineering, Retrieval-Augmented Generation (RAG), document chunking, embeddings, vector and hybrid search, agentic workflows, tool/function calling, structured outputs, evaluation, guardrails, observability, latency/cost awareness, AI-assisted SDLC; OpenAI/ChatGPT, Claude, GitHub Copilot, Cursor, Windsurf, Codex

Back-End & APIs: C#, .NET/.NET Core, ASP.NET Core Web API, ASP.NET MVC, Entity Framework, LINQ, ADO.NET, REST APIs, background jobs, Node.js, Express.js; Java and Python scripting

Front-End: React.js, JavaScript, TypeScript, Angular, AngularJS, Blazor Server, jQuery, AJAX, HTML5, CSS3, Bootstrap, Material UI, Razor

Architecture & Engineering: system design, API contracts, modular services, microservices patterns, event-driven and asynchronous workflows, design patterns, SOLID, dependency injection, scalability, resilience, performance tuning, monitoring and observability

Data: SQL Server, PostgreSQL, MongoDB, MySQL, data modeling, stored procedures, joins, indexing/query optimization, API-to-database integration

Cloud, DevOps & Quality: Azure, Azure DevOps, Docker, CI/CD, Git, GitHub, GitLab, TFS, SonarQube, Datadog, Kong; AWS fundamentals (EC2, S3, IAM, CloudWatch, VPC)

Technical Leadership: module ownership, architecture/design reviews, requirements, estimation, code reviews, mentoring, release coordination, client/SPOC communication, Agile/Scrum and cross-functional delivery

PROFESSIONAL EXPERIENCE

Software Engineer II | Zinnia | Apr 2025 - Present

- Build and enhance Agent Onboarding and Commission Calculation capabilities for U.S. life and annuity clients, covering onboarding, background verification, licensing, appointments, and related operational workflows.
- Contribute to system design for REST APIs, data flows, persistence, reporting, and service integrations across .NET/.NET Core, AngularJS/Angular, MongoDB, SQL Server, PostgreSQL, and Java-based downstream platforms.
- Support event-driven and asynchronous integrations, API gateway flows, and cross-system troubleshooting in a distributed enterprise environment, improving reliability, traceability, and data consistency.
- Modernize legacy schedulers and backend processes to improve execution efficiency, maintainability, operational stability, and production reliability.
- Strengthen code quality and release readiness through code reviews, Azure DevOps, Git/GitHub/TFS, SonarQube, Datadog, release coordination, and cross-functional engineering practices.

Module Lead | Smart Energy Water | Sep 2022 - Apr 2025

- Served as Module Lead and SPOC for six global utility clients, owning requirements, estimation, technical planning, delivery coordination, stakeholder communication, mentoring, and production issue resolution across time zones.
- Designed and maintained enterprise ASP.NET MVC/C# workflows, REST APIs, integration components, service/data-access layers, and SQL Server-backed data flows; developed Razor, JavaScript, jQuery, and AJAX interfaces.
- Investigated application and SQL performance issues by tracing end-to-end flows, reviewing queries and repeated data access, and optimizing processing logic to improve efficiency, reliability, and maintainability.
- Partnered with BA, QA, cloud, delivery, and database teams on architecture, code reviews, CI/CD, releases, and production support in Azure-hosted environments.
- Delivered a GPT/LLM-based workflow automation for customer quote and response processes, reducing manual work and improving operational efficiency by 20%.

EARLIER EXPERIENCE

Associate Consultant Developer | Oodles Technologies | Mar 2022 - Sep 2022

- Redesigned and enhanced the PM247 production web application using ASP.NET MVC, C#, SQL Server, JavaScript, jQuery, Razor, REST APIs, and Azure deployment practices.
- Built UI features, integrated backend APIs, followed layered MVC architecture, and collaborated with QA on issue resolution and release stabilization.

Associate Software Engineer | SmartData Enterprises | Sep 2021 - Mar 2022

- Developed and maintained ASP.NET MVC applications using C#, Entity Framework, LINQ, SQL Server, stored procedures, and workflow-based backend systems.
- Estimated enhancements, improved SQL/data flows, and resolved production issues to strengthen module reliability and maintainability.

Associate Software Engineer | Brucode Technology Pvt. Ltd. | Sep 2020 - Sep 2021

- Built and supported ASP.NET/C# web applications, JavaScript/jQuery frontends, SQL Server data-access modules, and Entity Framework-based features.
- Completed practical ASP.NET 5.0 training while contributing to production-style web modules and SQL-driven functionality.

SELECTED AI & ENGINEERING PROJECTS

GenAI Workflow Automation | GPT/LLM, .NET, REST APIs

- Contributed end-to-end from requirements and solution design through prompt/workflow integration, testing, deployment support, and production use; achieved a 20% improvement in operational efficiency.

RAG & Agentic AI Prototypes | .NET, Python, Node.js, Embeddings, Vector Search

- Designed and prototyped RAG and agentic workflow patterns for grounded enterprise Q&A and automation, covering content ingestion, chunking, embeddings, vector retrieval, prompt orchestration, tool calls, structured outputs, retries/fallbacks, guardrails, and evaluation.
- Built supporting Python/Node.js scripts and API integration patterns for preprocessing, automation, and service connectivity.

EDWAO - ATS / Virtual Campus Platform | React 18, Node.js, Express, .NET Core API, SQL Server, EF

- Built full-stack ATS, job-seeker, onboarding, education, attendance, calendar, examination, and reporting workflows across React components, REST APIs, backend services, and database integration.

Health Sapiens | .NET Core API, Angular 6, SQL Server, Entity Framework

- Developed provider, patient, and administrator portal features with role-based user journeys and .NET Core API-to-SQL Server integration.

PM247 Digital | ASP.NET MVC, C#, SQL Server, JavaScript, jQuery, Razor, Azure

- Enhanced customer-facing service workflows, REST API integration, SQL-backed data access, and Azure deployment for a production digital-services platform.

ENGINEERING PRACTICES & DOMAIN EXPERIENCE

Practices: full software development life cycle (SDLC), Agile/Scrum, technical specifications, code reviews, root-cause analysis, production incident support, release management, documentation, and cross-functional delivery

Domains: life and annuity insurance, producer/agent onboarding, licensing and appointments, commission workflows, utilities and energy, healthcare, HR/ATS, education, and digital services

EDUCATION

Integrated Bachelor of Technology (B.Tech) + Master of Technology (M.Tech) in Computer Science and Engineering (Software Engineering)

Sharda University, Greater Noida, India | 2016 - 2021 | 70.87%

PUBLICATION & TRAINING

Publication: [Named Entity Recognition in Natural Language Processing: A Systematic Review](#) | Springer, 2022

Training: Crio.Do - 1-year full-stack development program focused on React and JavaScript; additional training in ASP.NET 5.0, HTML/CSS, SQL, and stored procedures.
